

HEAVY DUTY/COMMERCIAL FLOODED BATTERIES

Target Market

- Heavy Duty and Commercial trucks
- HD Group 31 battery class
- DC31 offers AGM performance at a conventional price

31-900CT / 31TSFleet / 1150 / 1110 / DC31

31-901CT / 31APFleet / 1151 / 1111

Feature	Advantage	Benefit
Vibration Resistant	Permanently Sealed Cover, Epoxy bonding of plates, and specially designed grid	Durable, maintenance free design, protects against the worst enemy of a truck battery—road vibration
Advanced frame, paste and alloy technology	Optimized for conductivity, superior cycling performance, and gas minimization	Protection against the heavy strain caused by frequent start-ups, overnight cab power demands, and long periods of use
Robust Envelope Separator and chemical formulation	Improves acid circulation and performance to allow the battery to remain cooler	Longer lasting than standard flooded batteries

Technical Specs

HEAVY DUTY/COMMERCIAL BATTERIES

SAE J2185 Performance Test Results

ACDelco consistently exceeds the industry starting and cycling HD standards!

Framed Positive Grid

Optimized for conductivity, The grid technology is vibration resistant and offers superior cycling performance

High Purity Alloy

Calcium alloy increases cycle life, improves performance, and minimizes gassing

Robust Envelope Separator

Improves acid circulation allowing the battery to remain cooler and extends battery life

Superior Negative Paste Formulation

Extreme bond resists flaking to improve overall performance and increase life
